Acknowledgment

I am deeply grateful for the opportunity to present this book, "**Human Anatomy and Physiology-I,**" aimed at providing pharmacy students with a comprehensive understanding of the fundamental concepts of human anatomy and physiology.

First and foremost, I would like to express my sincere gratitude to Punet Kumar, Sangam Singh, Sushma Pal, and Shubhanshi Saxena for their invaluable guidance, support, and encouragement throughout the development of this book. Their insights and suggestions played a pivotal role in refining the content and enhancing its quality.

I am also indebted to my teachers, mentors, and colleagues, who have inspired me with their knowledge and dedication. Their influence has greatly shaped my approach to presenting complex topics in a simple and accessible manner.

A special thanks to my family and friends for their unwavering support, patience, and motivation, which have been a constant source of strength during the writing process.

Lastly, I extend my heartfelt appreciation to the publishers and the editorial team for their meticulous efforts in bringing this book to fruition.

To the readers, your feedback and suggestions are invaluable to me. I hope this book serves as a helpful resource in your academic and professional journey.

Thank you,

Deepak Kumar

Preface

The book "Human Anatomy and Physiology-I" is written to provide pharmacy students

with a fundamental and practical understanding of human anatomy and physiology. This book

presents key concepts in a simplified and structured manner, making it easier for students to

grasp and apply the knowledge in their academic and professional journeys.

The content covers a detailed study of various organs, their structures, and functions. Each

chapter is designed to facilitate comprehensive learning with clear explanations, relevant

examples, and illustrative diagrams. This ensures that students not only excel in their

academics but also develop a practical approach to applying these concepts in their pharmacy

careers.

I express my heartfelt gratitude to Puneet Kumar, Sangam Singh, Shubhanshi Saxena, and

Sushma Pal, whose guidance and support have been instrumental in shaping this book.

I humbly request the readers to share their feedback and suggestions for further improvement

of this book in future editions.

Thank you,

Deepak Kumar

Table of Contents

Unit-I

Introduction to the human body: Definition and scope of anatomy and physiology (1), levels of structural organization and body systems (1-5), basic life processes (5), homeostasis (6-7), basic anatomical terminology (7-8).

Cellular level of organization: Structure and functions of cell (9-16), transport across cell membrane (16-18), cell division (19-21), cell junctions (21-23). General principles of cell communication (23-24), intracellular signaling pathway activation by extracellular signal molecule (25,26), Forms of intracellular signaling: a) Contact-dependent; b) Paracrine; c) Synaptic; d) Endocrine (26-28).

Tissue level of organization: Classification of tissues, structure, location, and functions of epithelial, muscular nervous, and connective tissues (28-30).

Unit-II

Integumentary system: Structure and functions of skin (31,32).

Skeletal system: Divisions of skeletal system (32-33), types of bone (33-36), salient features and functions of bones of axial and appendicular skeletal system (36-40). Organization of skeletal muscle (40-41), physiology of muscle contraction (41-42), neuromuscular junction (42-43).

Joints: Structural and functional classification (59-61), types of joint movements, and its articulation (44-49).

Unit-III

Body fluids and blood: Body fluids, composition and functions of blood, hemopoiesis, formation of hemoglobin, anemia, mechanisms of coagulation, blood grouping, Rh factors, transfusion, its significance and disorders of blood, Reticuloendothelial system (50-67).

Lymphatic system: Lymphatic organs and tissues, lymphatic vessels, lymph circulation and functions of the lymphatic system (67-71).

Unit-IV

Peripheral nervous system: Classification of the peripheral nervous system, Structure and functions of sympathetic and parasympathetic nervous system, Origin and functions of spinal and cranial nerves (72-75).

Special senses: The structure and functions of the eye, ear, nose, tongue and their disorders. (75-83)

Unit-V

Cardiovascular system: Heart – anatomy of heart, blood circulation, blood vessels: structure and functions of artery, vein, and capillaries, elements of conduction system of heart and heartbeat, its regulation by autonomic nervous system, cardiac output, cardiac cycle. Regulation of blood pressure, pulse, electrocardiogram and disorders of the heart (84-98).
